ARAN FELIX

STATISTICIAN | DATA ANALYST | RESEARCH & M&E PROFESSIONAL

Kenya · Professional portfolio · LinkedIn · GitHub

PROFESSIONAL PROFILE

Statistician and data analyst with a BSc in Pure Statistics and over four years of experience supporting research, public-sector programmes and business decisions. I founded an independent analytics practice that has served more than 500 clients since 2022. My work combines data collection, quality assurance, statistical analysis, dashboards and clear reporting. I work with Python, R, SQL, SPSS, Stata, Excel and Power BI, and I translate technical results into evidence that colleagues and clients can use.

SELECTED ACHIEVEMENTS

500+ consultancy clients served | **14** field interviewers supervised | **20** loan defaulters resumed repayments following outreach

PROFESSIONAL EXPERIENCE

Founder and Lead Data Analyst | Africa Digital Analytics Center (ADAC)

Nairobi, Kenya · Apr 2022 - Present

- Lead quantitative research and analytics assignments for more than 500 individual and organisational clients across research, NGO and private-sector contexts.
- Develop Python, Excel and Power BI workflows, dashboards and reporting tools; manage work from initial requirements to final delivery, often within 24-hour to one-month cycles.
- Conduct statistical and econometric analyses, check source data, and present findings in clear language for non-technical decision-makers.
- Analyse agricultural market trends and supply-chain performance, identifying price patterns and operational challenges.

Loan and Data Analyst Intern | Uwezo Fund

Nakuru West, Kenya · Jan 2026 - Present

- Built an Excel-based loan portfolio tool to prioritise borrower follow-up by ward, borrower group and repayment risk; supervisors adopted it for outreach planning.
- Reviewed portfolio information and supported outreach involving 100+ active borrowers and 300+ defaulters; 20 defaulters resumed repayments following targeted follow-up.

Research Assistant (Field Supervisor) | Kenya National Bureau of Statistics (KNBS)

Nakuru County, Kenya · Jan 2022 - Mar 2022

- Supervised 14 field interviewers during the 2022 Kenya Demographic and Health Survey, assigning tasks and applying data quality procedures.
- Collected and validated establishment survey data using ODK Collect and REDCap, and coordinated field logistics and community entry.

ADDITIONAL FIELD EXPERIENCE

Census Enumerator | KNBS, Migori County | Aug 2019 — Household listing, structure numbering and census data collection using CAPI.

NIIMS Enumerator | Nairobi County | 2019 — Registration data collection, informed consent and confidentiality procedures.

SELECTED RESEARCH AND ANALYTICS PROJECTS

Mapping Kenya's Electorate: Registration, Turnout and Demographic Patterns, 2017-2022

Python · Statistical analysis · Data validation · Geospatial visualisation | View case study

- Analysed official IEBC voter-registration and presidential-results records alongside KNBS population data across 47 counties, 290 constituencies and 1,450 wards.
- Documented national voter registration growth from 19.61 million to 22.12 million and the decline in presidential turnout, with reproducible validation and source limitations.

FTSE 100 News Sentiment and Event Analysis

Python · FinBERT · XGBoost · SHAP/LIME · Time-series features

- Processed 53,330 financial news headlines, engineered market and sentiment features, and trained classifiers for next-day FTSE 100 direction.
- Reported XGBoost performance of 65.4% accuracy, F1 = 0.714 and ROC-AUC = 0.711; used model explanations to identify influential inputs.

Facial Keypoints Detection Using Deep Learning

Python · TensorFlow/Keras · Convolutional neural networks

- Designed and trained a convolutional neural network to predict 15 facial keypoints from 96 × 96 grayscale images.
- Achieved a reported validation root mean squared error of 2.23 pixels and documented training, evaluation and model limitations.

EDUCATION

Bachelor of Science in Pure Statistics | Laikipia University, Kenya | 2017-2022

TECHNICAL SKILLS

Statistics and research: SPSS, Stata, R, Python, descriptive and inferential analysis, data validation, survey analysis

Analytics and business intelligence: SQL, Excel, Power BI, Tableau, Plotly, data preparation, reporting dashboards

Machine learning: scikit-learn, XGBoost, TensorFlow/Keras, NLP, SHAP and LIME

Data collection: ODK Collect, REDCap, CAPI and SurveyCTO

LANGUAGES

English · Kiswahili · Dholuo
